

Final Minutes
EIIP Co-Chairs Conference Call
October 17, 2002

Research Triangle Park, North Carolina

ATTENDEES

The following people were on the call:

Dennis Beauregard, Steering Committee
Chuck Mann, Area Sources Committee
Bob Betterton, Point Sources Committee
Patrick Barickman, Emissions Modeling Committee
Roger Westman, Steering Committee
Joe Pedelty, Mobile Sources Committee
Gary Dolce, Mobile Sources Committee
Gene Tierney, Mobile Sources Committee
Lynn Seel, Locomotive Workgroup

COMMITTEE REPORTS

Point Sources Committee

The PSC will be getting together in a month or two to discuss the project for updating the manmade stationary source portions of the Battye Report.

Bob Betterton discussed a concern that had been raised about the Surface Coating MACT not referencing the EIIP guidance document for surface coating. The PSC will be reviewing both documents to explore the issue further.

I discussed recent interactions we've had with representatives of the National Paint and Coatings Association (NPCA) regarding the EIIP Paint and Ink Manufacturing Document. EIIP has provided 75 K for a project to update the document. Randy McDonald from the Emission Standards Division is the project lead. Allen Hatfield from Rutgers University is conducting the study and will be improving the theoretical approaches in the existing document to estimate emissions from Paint and Ink Manufacturing.

Area Sources Committee

Revised abstracts and chapters for area source categories were delivered to the committee by the contractor (ERG) at the end of September. These incorporate changes to reflect the replacement of SIC codes with NAICS codes. For seven abstracts and three chapters, the revised documents can probably be updated to the EIIP website in the near future. For remaining chapters, mainly involving solvent use categories, a decision is needed whether to hold the revised chapters until results from other solvent studies are available, or to make some editorial changes to the revised EIIP chapters and go ahead and update the documents on the website for these chapters as well.

Emissions Modeling Committee

The EM Committee co-chairs recently sent out a message indicating the follow-on future year spatial allocation project would not be pursued (due to lack of Steering Committee support and support from others in the EI community) and asked the EM Committee to review its priority list for projects to pursue during FY-03. These will be discussed on the next Committee conference call.

Nonroad Project

The Nonroad Project approved for funding at the Spring SAEWG meeting has yet to move forward since the focus of OTAQ activities at this time is on the Mobile Source PM Fine testing in Kansas City.

Mobile Source PM Fine

The Kansas City Mobile Source testing project is in the project outline/workplan phase. Gene Tierney indicated that he would schedule a conference call in a week or two to discuss the details. I promised to forward to him the group e-mail list for the PM Fine Committee which he will use in addition to the member list for the Mobile Sources Committee. Questions to be answered include making sure the list of compounds for testing is complete, how to select vehicles for testing and what contract mechanisms are available.

Locomotives

Lynn Allen from SCDHEC has formed a small workgroup. She solicited participation from others on the call with an interest in locomotive emissions. Lynn has a proposal and has talked with the consultant. The proposal is somewhat general and the project could go in a couple of directions depending upon the level of involvement we have with one or more railroad companies. The consultant has conducted other projects with various railroad companies and the American Association of Railroads (AAR). Key to the direction of the project is obtaining activity data. Without the activity data, surrogate data will be needed. Lynn is proposing to move ahead with the project by asking the contractor to prepare a detailed workplan to better evaluate what direction the project should take.

OTHER BUSINESS

Results of SAEWG Meeting - Projects for FY-03

Roger Westman provided summary of the projects recommended for approval at the last SAEWG meeting. The projects are as follows:

Project	Funding (thousand of dollars)
Mobile Source PM	500
Fugitive Dust/NH3	175
NH3 State of the Science Paper	20
Wildfires	25
Toxics (top down)	100
Toxics QA	<u>100</u>
	920

NEW BUSINESS

No new business was brought up.

NEXT CALL

The next call is scheduled for November 20, 2002 from 3:00 to 4:30 (919-541-4328). It will have to be rescheduled due to a conflict. I will send out a notification advising participants of the new date and time.

Dennis Beauregard, Coordinator
